CARR241 regulator/rectifier

Left diagram (red box):

- Yellow1 stator phase
- Yellow2 stator phase
- Yellow3 stator phase
- GREEN = frame ground
- RED = Battery +ve

Original Rectifier

- White = excitation current to field coil
- Green = regulator ground
- Black = IGN switched +ve Sense
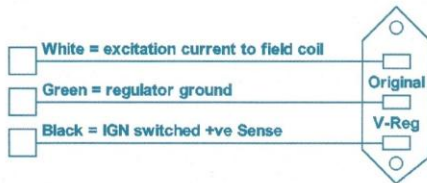

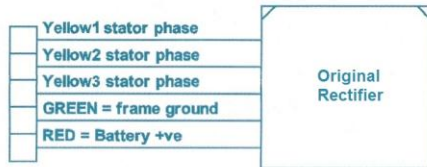

Original V-Reg

REMOVE ORIGINAL RECTIFIER & V-REG BOTH PARTS

Right diagram (green box):

CARR241

5pin block "Rectifier Connector"

- Yellow1 stator phase
- Yellow2 stator phase
- Yellow3 stator phase
- GREEN = frame ground
- RED = Battery +ve

3 spades "Pointless Regulator Connectors"

- White = excitation current to field coil
- No connection (was old regulator ground)
- Black = IGN switched +ve Sense
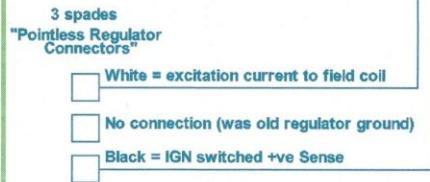

COMBINED RECTIFIER AND REGULATOR
